

# EXCAVATION LADDER

## THE NEW GENERATION LADDER FOR ACCESS UP TO OF 4.75 M DEPTH

This aluminium ladder allows descents to be made into excavations ranging from 1 to 4.75m. Its 80 mm steps, access ramps, swivel skids and front exit guarantee perfect safety for the user. The ladder has been made ultra practical in 2021 thanks to its telescopic system, adjustable feet, crane rings and moving wheels.

- ▶ **Safety:** a passageway at platform level for easier access. Two ramps to guarantee total safety when climbing up or down.
- ▶ **Practicality:** a folding platform for minimising storage space and facilitating transport. Two wheels to make the product easier to move.
- ▶ **Modularity:** telescopic models to adapt to all sites (foundations, site excavations, etc.).

### Product characteristics

<b>Use</b>	Ultra intensive
<b>Type of floor</b>	Flat and offset flooring
<b>Max access / working height (m)</b>	4,75
<b>Material</b>	Aluminium
<b>Maximum load (kg)</b>	150
<b>Warranty (years)</b>	5

Non-slip steps 80 mm

Non-slip swivelling skids to suit all situations

Wheels for ease of movement

Lifting rings as a standard

Telescopic feet on the platform level
